SUMMARY

Full Stack Developer with hands-on experience in **React**, **Spring Boot**, and **AWS**, building performant, scalable web applications. Passionate about clean architecture, continuous learning, and crafting intuitive user experiences in Agile teams.

SKILLS

Languages: **Java**, **JavaScript**, **TypeScript**
Frameworks/Libraries : **React.js**, **Spring Boot**, Next.js
Cloud / DevOps : **AWS**, **Docker**, Kubernetes, GitHub Actions
Others : **Material UI**, Node.js, Firebase, Tailwind CSS, SonarQube, Black Duck

EXPERIENCE

Mercedes-Benz Research and Development

Full Stack Developer **November 2023 - Present, Bengaluru**

- **Designed, developed, and deployed** scalable **React.js applications**, delivering production-ready features within strict timelines and ensuring high performance and reliability.
- **Created UI/UX designs and low- to high-fidelity prototypes in Figma**, contributing to **initial product ideation, user flows, and design validation** before development.
- **Built and optimized RESTful APIs** using **Spring Boot**, improving backend response times and ensuring seamless integration with frontend services.
- **Enhanced code quality and security** by integrating **SonarQube** for static code analysis and **Black Duck** for third-party dependency vulnerability scanning.
- **Optimized cloud infrastructure on AWS** by migrating workloads to a **serverless architecture** using **CloudFront**, significantly reducing EC2 operational costs while maintaining scalability.
- **Improved development efficiency by ~20%** by driving team-wide adoption of **GitHub Copilot**, enabling faster coding and improved code consistency.
- **Translated Figma designs into responsive, accessible React components**, improving overall UI consistency and user experience.
- **Mentored junior developers**, conducted code reviews, and promoted best practices in clean code, performance optimization, and cloud resource management.
- **Continuously monitored and optimized AWS resources**, ensuring cost-effective infrastructure without compromising system reliability.

Incture Technologies

Full Stack Developer **July 2022 - November 2024, Bhubaneswar**

- **Refactored and modernized legacy codebases**, adopting contemporary frameworks and design patterns to improve **system performance by ~20%**, while enhancing scalability, readability, and long-term maintainability.
- **Managed seamless code promotion across environments** (development, staging, production) by enforcing **version control best practices**, CI/CD workflows, and rigorous pre-release testing.
- **Designed and implemented modular, reusable architectures**, enabling shared components and services to be efficiently reused across multiple applications and teams.
- **Developed and integrated RESTful APIs**, ensuring reliable and secure communication between frontend and backend systems while following REST design standards.
- **Strengthened code quality through automated testing**, implementing **unit, integration, and end-to-end tests** using **React Testing Library** and **Enzyme**, significantly reducing production defects.
- **Collaborated within Agile teams**, actively participating in **sprint planning, daily stand-ups, reviews, and retrospectives**, ensuring consistent delivery aligned with business requirements.

EDUCATION

Bachelors Degree in Electrical Engineering

Veer Surendra Sai University of Technology • Sambalpur, Odisha • 2022

CERTIFICATIONS

AWS Certified Developer - Associate

AWS • 2025

Scrum Master Alliance

SAFe • 2025

Figma UI UX Design Essentials

Udemy • 2025
